

The ESO Advantage

SOFTWARE-AS-A-SERVICE MODEL

Our on-demand web services delivery model results in lower cost of ownership, greater data accessibility, and quick deployment.

MOBILE SOFTWARE APPLICATION

Use ESO Pro™ Mobile on a handheld tablet computer to enter data at the patient's side and capture patient signatures electronically in the field — no internet connection required!

INTERFACE CAPABILITIES

Interface capabilities include CAD and cardiac monitors, fire records, hospital medical records, and billing applications.

FAST, NO-COST IMPLEMENTATION

Our application requires little set-up and only minimal configuration.

SUPERIOR REPORTING TOOLS

Clinical and operational reports are fully customizable and exportable and can be scheduled to run automatically.

QUICK TREAT™ FUNCTIONS

Easily record patient vitals, medications, cardiac arrest treatments, and other EMS events, regardless of where you are in the patient record when the events are occurring.

COMPLETE BILLING SOLUTIONS

ESO Solutions' complete billing service offers incredible value and flexibility and fully integrates with the ePCR Suite of services.

ESO Solutions Pro™ ePCR Suite: Designed by Medics for Medics

The **ESO Pro™ ePCR Suite** is a powerful tool developed by industry experts who understand your needs. Our NEMSIS-compliant system is designed to provide you with invaluable operational and clinical data as well as improve your organization's billing and collection process.

From the most progressive electronic patient care reporting available, to our innovative approach to billing services, ESO Solutions does it for you!

Data Accessibility

Access the data you need anytime, anywhere. The ESO Pro™ ePCR Suite is an intuitive, medic-friendly web-based application that runs on any computer with an internet connection. Or for even greater efficiency and flexibility, choose our mobile solution. ESO Pro™ Mobile is a stand-alone application that runs on a tablet computer and works independently of a continuous internet connection so you can enter data right at the patient's side.

Ease of Use

Our medic-flow entry process includes several features to help you document patient care accurately, easily, and efficiently:

Patient Look-Up Feature - Quickly access a previous patient's data, including medical history/medication/allergy and billing information. Patient privacy is maintained throughout, as all HIPAA-related information is encrypted.

Built-In Tracking Tools - Track controlled substances, vehicles, equipment, and patient personal belongings with built-in tracking tools.

Validation Tools - Be confident that medics will always capture the required information on each ePCR. Our validation tools take the guesswork out of patient care reporting.

Specialty Patient Forms - Document specific call types such as stroke, cardiac arrest, obstetrics, and more.

Solutions for Everyone

ESO Pro™ meets the need of EMS systems everywhere by providing a NEMSIS-compliant electronic patient care record (ePCR) that is easy to implement, regardless of the size or budget of your organization. Our annual subscription fee includes all hosting and server administration, unlimited administrator and user accounts, quarterly upgrades, and all support and maintenance. Let us customize a solution that meets your organization's needs.

ESO Pro™ Reporting Tools

INTUITIVE, USER-FRIENDLY REPORT GENERATION

Create reports quickly and easily from any internet connection, without the need for specialized software training.

GENERAL OR SPECIFIC VIEWS

Select the parameters (date, unit, personnel) that will help you best analyze your data. Access a broad system view of your organization, or drill down into an individual patient care record for a more detailed view.

CANNED REPORTS

Access over 65 canned reports at the click of a mouse for visibility into operational and clinical performance.

AD-HOC REPORTING

Create an unlimited number of completely customized reports at no additional cost, and email them to the individuals you designate.

REPORT SCHEDULING

Schedule reports to run off "triggers" that alert key personnel of sentinel events, or to run at regular intervals.

FULLY EXPORTABLE DATA

Export reports to Microsoft Word, Excel, and PDF formats.

Increase Revenue and Productivity

Choose ESO Solutions as your ePCR provider, and start enjoying the benefits right away:

Validated Patient Care Records - Submit complete, accurate patient care records the first time around, and enjoy greater returns and faster turnaround times on Medicare, Medicaid, and private insurance claims.

Increased Efficiency - Eliminate redundant data entry processes with our mobile software.

Fewer Infrastructure Requirements - Spend less time and fewer resources on administrative processes, and focus instead on your core competency — providing quality medical care.

Flintstone, Wilma
Patient 7 of 9

TREATMENTS	FIRST RESPONDER AID	DISPOSITION	CUSTOM
0620 Airway BLS	Oxygen NC 4 lpm	Bonham, Jason	
0622 IV Therapy	IV w/NS 19G Left - AC 750 ml successful	Bonham, Jason	
0623 Medication	Aspirin Oral 324 mg Condition Undamaged	Bonham, Jason	
0625 Medication	Nitro Paste Transdermal 1/2 inches Condition Unchanged	Bonham, Jason	
0625 Medication	Nitrostat Oral 0.4 mg Condition Improved	Bonham, Jason	

Integrate with Other Systems

Send and receive data to and from systems such as CAD, billing programs, cardiac monitors, and your state data repository:

CAD Interface Capabilities - Valuable location and call times flow directly into the ESO Pro™ mobile application using ESO Solutions' CAD interface.

Billing Interfaces - Stream billing information to popular billing applications.

Cardiac Monitors - Import cardiac monitor data automatically from the monitor to the ESO Pro™ ePCR.

Data Repositories - We submit your state required data at no additional cost!
